

Proven Leadership in Aerospace Certification

Presence across India, SE Asia, Africa, Middle East and Europe

Rich Domain Experience with 6000+ Successful Audits

NVT QUALITY CERTIFICATION

MANAGEMENT TEAM

KG Garg

K.G. Garg, holds a Bachelors and Masters Degree in Metallurgical Engineering from Indian Institute of Technology (Roorkee), a Bachelors Degree from Aeronautical Society of India, Graduate NDI from AFTC USA and has completed the Lead Assessor course for ISO 9001 from Neville Clarke UK, ISO 14001 from QMI UK, TL 9000 from Excell, USA and AS 9100, AS 9110 & AS 9120 from Plexus Corporation, USA

Nitin Garg

Nitin Garg holds an MBA from Tepper School of Management, Carnegie Mellon University, USA and Bachelors and Masters in Mechanical Engineering from Indian Institute of Technology (IIT), Bombay. Nitin has been instrumental in establishing International School of Management Excellence (ISME, Bangalore) as the founding Director.

R.C. Chaturvedi

Mr. R.C.Chaturvedi holds a Bachelor of Engineering degree in Mechanical Engineering from Maulana Azad College of Technology, Bhopal, and Post Graduate Degree in Aeronautics from Ecole Nationale Supérieure de l'Aéronautique et de l'espace (E.N.S.A.E. Sup.Aero.), Toulouse, France. He has completed Lead Assessor course for ISO 9001 from BSI, and AS 9100 from Plexus, Corporation, U.S.A. He has more than 35 years of working experience in the Aerospace industry. He has conducted more than 100 audits for QMS & AQMS audits.

S. Raghunathan

Mr. S. Raghunathan holds a Bachelor of Engineering degree in Electrical Engineering from Indian Institute of Technology, Madras and has completed Lead Assessor course for ISO 9001 from BSI, and AS 9100, AS 9110 and AS 9120 from Plexus, Corporation, U.S.A. He has more than 35 years of working experience in the field of manufacturing, assembly of aircraft, quality and other disciplines of the aerospace industry along with third party certifications. He has conducted more than 600 audits for QMS and AQMS standards.

S.B. Harikrishna

Mr. S.B.Harikrishna holds a Bachelor of Engineering degree in Mechanical Engineering from RVCE, Bangalore and has completed Lead Assessor course for ISO 9001 from QED, U.K., in ISO 27001 from IIQM, Bangalore, and AS 9100, AS 9110 and AS 9120 from Plexus, Corporation, U.S.A. He has more than 25 years of working experience in the field of aerospace, automotive and third party certifications. He has conducted more than 1000 audits for QMS, AQMS & ISMS standards.

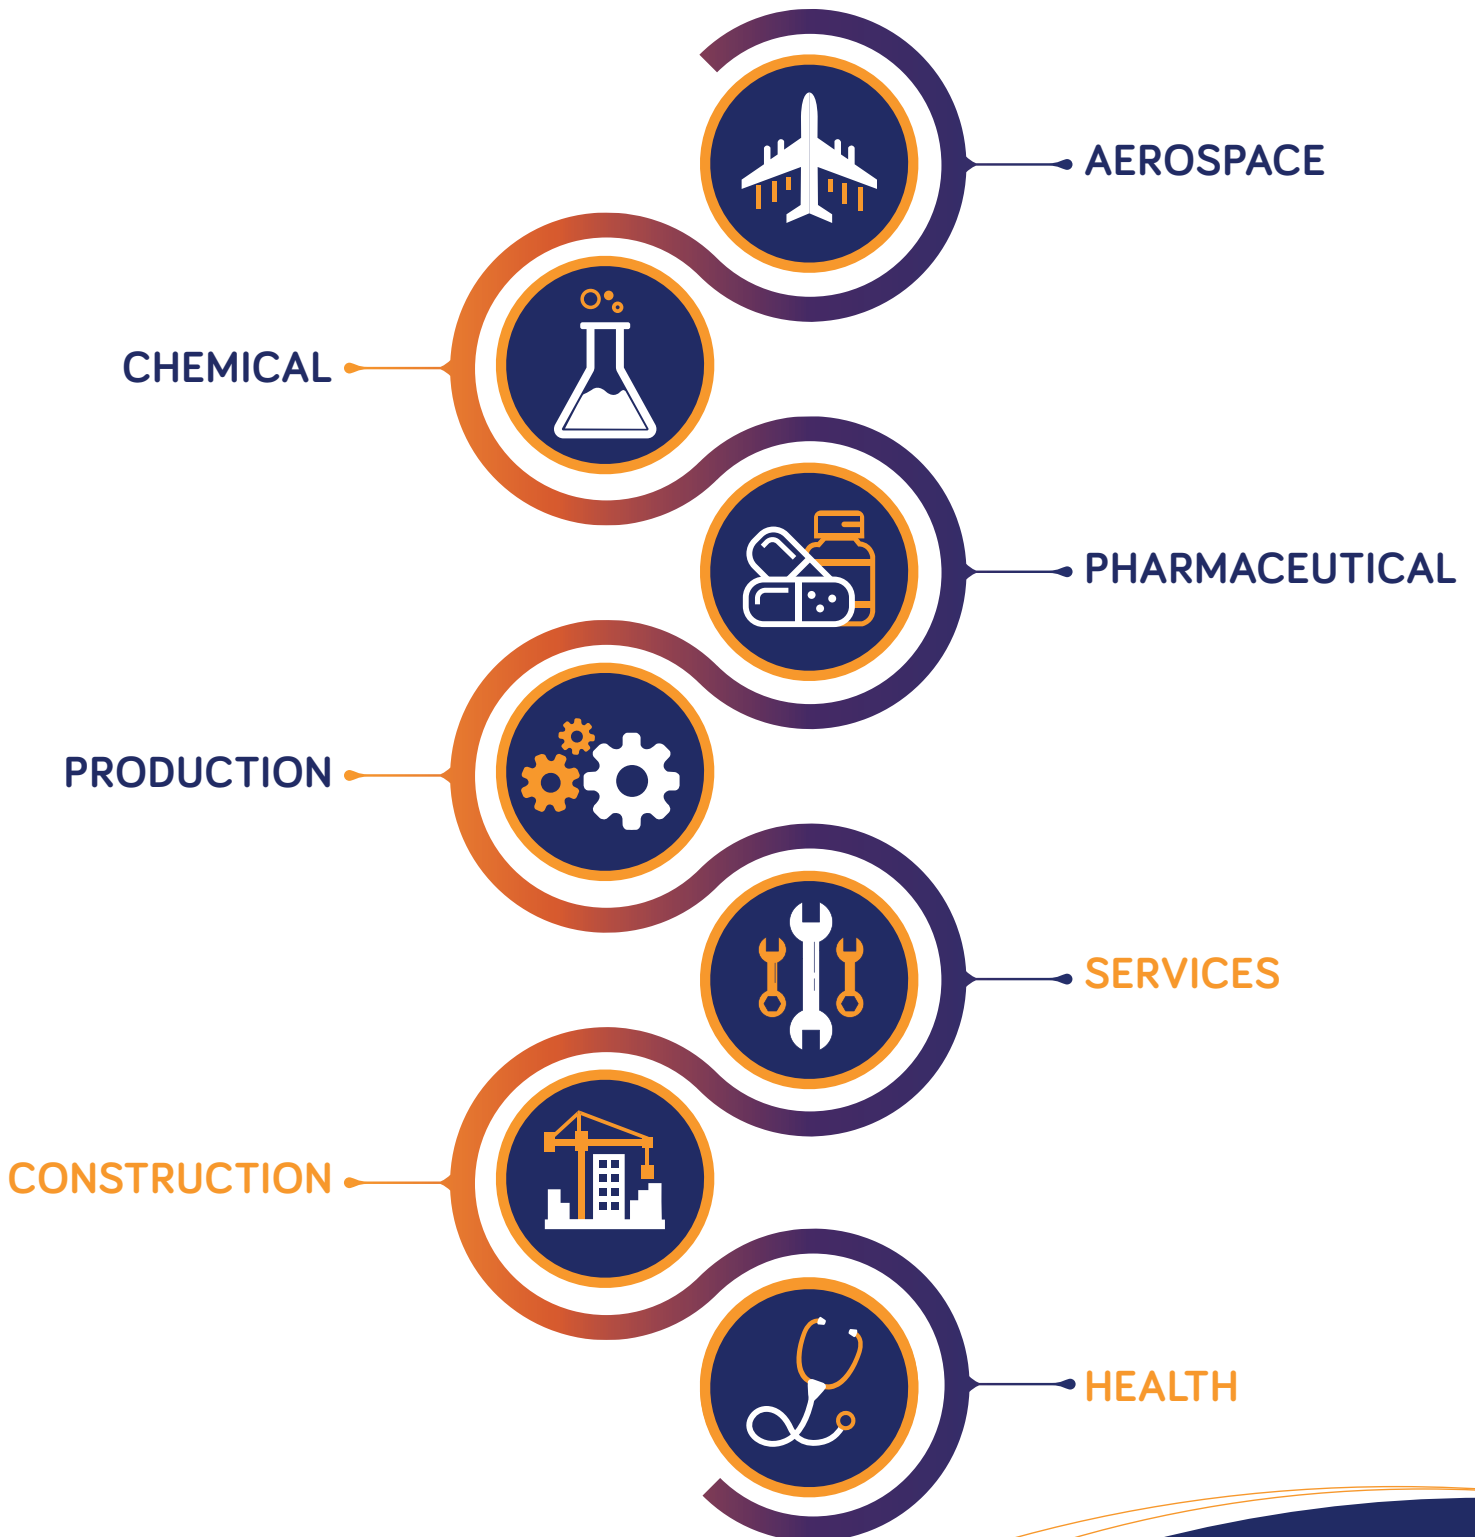

Tanuj Garg

Tanuj Garg holds an MBA from The Wharton School, University of Pennsylvania, a Master of Science, Electrical and Computer Engineering from Carnegie Mellon University and a Bachelor of Technology, Telecommunication Engineering from RVCE, Bangalore. Tanuj was a Fellow candidate at The Wharton School and a University medallist during his Engineering program.

Vivek Garg

Vivek Garg holds an MBA from Krannert Graduate School of Management, Purdue University, USA and Bachelors in Electronics Engineering from National Institute of Technology, Allahabad. He was the recipient of Deans List award for his overall performance at Purdue University and invited by the faculty at Purdue to be a life time member of Beta Gamma Sigma, the highest honour by faculty for recognition of his scholastic achievement at Purdue.

DOMAIN SERVICES

The NVT QC Leadership team is comprised of a diverse team of globally recognized executives with a combined 900 + years of business experience in Aerospace, Environmental management, Occupational Health, Food, Energy, Information technology and Automotive, committed to delivering excellence in their respective domains. Together we are determined to be one of the world's best certification partner to various industries.

STANDARDS

NVT QC is one of the most trusted certification bodies with a proven record of partnering organizations through effective and efficient auditing process to become more competitive with their quality journey. It is through this process-based auditing that clients continue to find success in partnership with NVT QC

ISO 9001 is the world's most widely recognized and widely used Quality Management System (QMS) standard. This quality management system will help you to continually monitor and manage quality across all operations, and outlines ways to achieve, as well as benchmark, consistent performance and service.

The standard promotes the adoption of a process approach emphasizing the requirements, added value, process performance and effectiveness, and continual improvement through objective measurements. In simple terms, it provides the basis for effective processes and effective people to deliver an effective product or service time after time.

The ISO 14001 certification helps organizations identify and control environmental impacts and improve performance. It is the most recognized international standard for environmental management system (EMS). It is designed to help businesses to remain commercially successful without overlooking environmental responsibilities and impacts. It can

also help you to grow sustainably while reducing the environmental impact of this growth. ISO 14001 is the principal management system standard which specifies the requirements for the formulation and maintenance of an EMS. This helps to control your environmental aspects, reduce impact and ensure legal compliance. It provides a framework through which an organisation can deliver environmental performance improvement in line with its environmental policy commitments.

The ISO 27001 is the standard that ensures the continued accessibility, confidentiality and integrity of information. It is an excellent framework that helps organizations manage and protect their information assets so that they remain safe and secure; an essential step for protecting your most vital assets. It adopts a process for establishing, implementing,

operating, monitoring, reviewing, maintaining and improving an organization's information security management system. Your organisation may not consider its information to be vulnerable or targeted for attack but in the borderless Internet-connected world disruptions to business IT processes can cripple your operations and allow your competitors to gain market share.

TAS9100, AS9110 and AS9120 are the International Standards for Aerospace Quality Management Systems. NVT Provides ANAB accredited certificates for AS9100D, AS9110C and AS9120B standards. These standards are applicable to aerospace quality management systems of organisations that supply to the aerospace and defence industries. These standards based on ISO 9001:2015 with additional industry specific requirements for aerospace.

AS 9100D:

It is the internationally recognized quality system standard specific to the Aviation, Space & Defence industry. It is the single common quality management standard for the aerospace industry. It is used and supported by the world's leading aerospace companies and throughout their supply chains. AS9100 can be used by organizations across the aerospace sector, including design, manufacturing, maintenance and distributing companies.

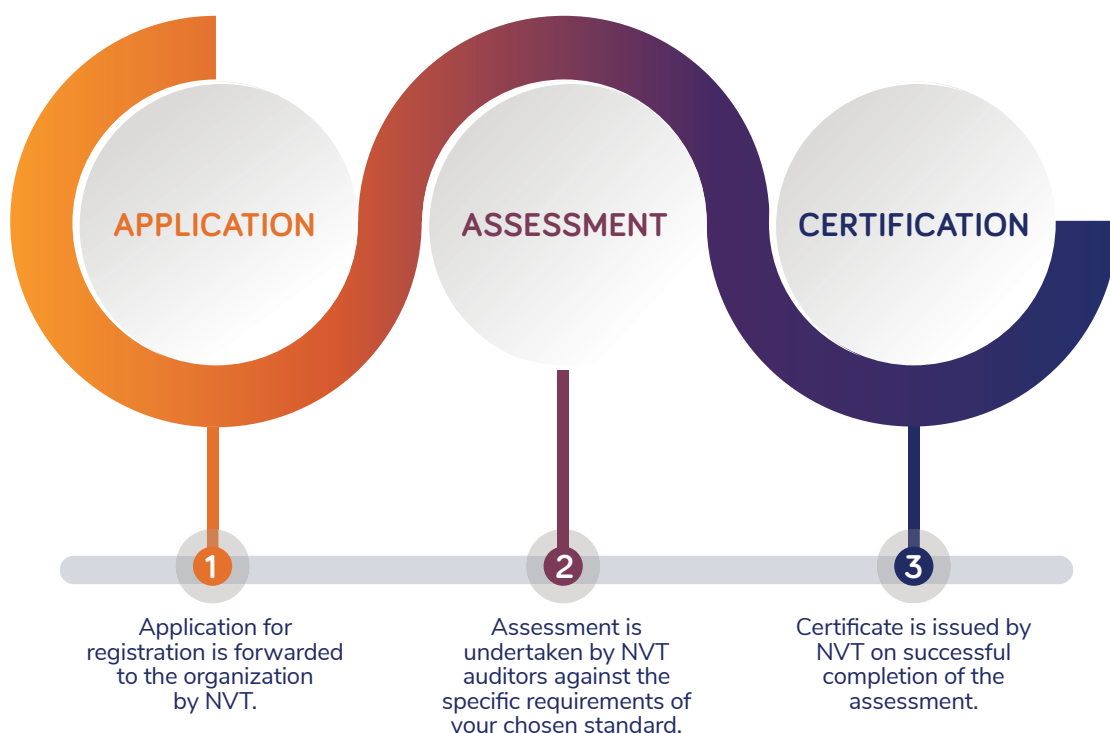

AS 9110C:

It is the internationally recognized quality system standard specific to the Aviation Maintenance organizations. It is the quality system aerospace model for quality assurance in maintenance, repair and overhaul of aerospace assemblies and parts. The standard meets the enhanced regulatory requirements to which aerospace repair stations are subjected to.

AS 9120B:

It is the internationally recognized quality system standard specific to Stockists and Distributors. It is the quality system assuring quality in warehousing and distribution of aerospace parts. The standard meets the enhanced regulatory requirements to which aerospace distributors are subjected to. AS9120 is for use by organizations that procure parts, materials and assemblies and sells these products to customers in the aerospace industry.

THE 3 STEPS OF CERTIFICATION

STANDARDS

The ISO 45001 is one of the International Standards for Occupational Health and Safety (OH&S). It is designed to prevent work-related injury and ill-health, while providing safe and healthy workplaces. As of March 2018, this standard replaces OHSAS 18001, which was the internationally recognized voluntary standard for OH&S. The new standard is designed

to significantly reduce the risk of injuries,

accidents and work-related diseases in companies. To achieve this, companies need to implement suitable methods and instruments. The standard is aimed at protecting not only a company's employees, but also other people working within the company's sphere of responsibility. As an international standard, ISO 45001 applies across geographic, political, economic, commercial and social boundaries. This sets a single benchmark for the management of occupational health and safety.

ISO 22000 is designed to help businesses within the food chain meet requirements for food safety management. It specifies the requirements that a food safety management system needs to meet. It maps out how an organisation needs to demonstrate its ability to control food safety hazards, in order to consistently produce food products, which are safe for the end

consumer. It combines the core elements

of ISO 9001 and HACCP to provide an effective framework for the development, implementation, monitoring and continual improvement of a documented Food Safety Management System (FSMS) that is aimed at mitigating the organization's overall business risk, as failures in food safety practices are dangerous and expensive with very serious consequences.

The ISO 50001 certification helps organizations drive energy efficiency in order to have a positive impact on the environment. It is a globally recognised standard developed in response to an increasing global awareness on energy performance.

It offers a systematic approach to reduce energy costs, greenhouse gas emissions, and other related environmental impacts. ISO 50001:2011

focuses specifically on factors that drive energy efficiency and have an impact on the environment. It also focuses on the cost benefits of using utilities more efficiently.

“

Ms Swapna Kanade

Associate Manager – TQM,
Tata Technology

“NVT has been our preferred choice because of competency and domain expertise of its auditor. NVT auditors are familiar with our operations. Their flexibility and accommodative approach has been appreciated by auditees, process owners and top management.

Accreditation

Accreditation is an independent recognition by accreditation boards that the Certification Body meets the requirements of defined criteria or standard.

ANAB:

NVT has been accredited by ANSI (American National Standards Institute) - ASQ (American Society for Quality) National Accreditation Board (ANAB), USA, for meeting ISO 17021 requirements and for the scope of QMS (ISO 9001), AQMS (AS 9100, AS 9110 & AS 9120) certification.

NABCB:

NVT has been accredited by The National Accreditation Board for Certification Bodies (NABCB), India, for meeting ISO 17021 requirements & for the scope of QMS (ISO 9001) certification.

act, it is a habit.

CERTIFICATION
PARTNERS

SOCOTEC - Certification International (SCI)

SOCOTEC - Certification International, established in 1995, has been providing management system assessment and UKAS accredited certificates to organizations around the world. SCI (UK) has been accredited for ISO 9001, ISO 14001, OHSAS 18001, ISO 27001, ISO 22000 and ISO 50001 by UKAS and is represented in 26 countries worldwide. CI (UK) became part of Socotec Group, the market leader in Certification and business risk management, and operates a network of partners located in 50 countries across five continents. NVT provides UKAS accredited SCI (UK) certificates for ISO 9001, ISO 14001, OHSAS 18001, ISO 27001, ISO 22000 and ISO 50001. In addition NVT provides UKAS accredited SCI (UK) IMS certificates for ISO 9001, ISO 14001 and OHSAS 18001

TRAINING

NVT QC believes in partnering with your organization to develop in-house skills to implement, audit, optimize and integrate your quality management systems. To this end, we have built a suite of training courses delivered by experienced and competent trainers. Our range of courses will help you use standards to drive organizational improvement and achieve accredited certification.

Overview

One-day program for top management, process owners, performers and Internal/new auditors and other professionals in providing an understanding of the applicable standard

Overview

The aim of the 2 days course is to provide new internal auditors and other professionals an understanding of AS 9100, AS 9110 and AS 9120 standard and the skills to undertake effective first and second party audits.

Overview

The aim of the 2 days course is to provide new internal auditors and other professionals an understanding of ISO 9001:2015 standard and the skills to undertake effective first and second party audits.

Overview

The aim of the 2 days course is to provide internal /new auditors and other professionals an understanding of ISO 14001:2015 standard and the skills to undertake effective first and second party audits.

Overview

The aim of the 2 days course is to provide new internal auditors and other professionals an understanding of ISO 45001:2015 standard and the skills to undertake effective first and second party audits..

Overview

The aim of the 2 days course is to provide internal /new auditors and other professionals an understanding of ISMS 27001:2013 standard and the skills to undertake effective first and second party audits.

Overview

Learning in quality is a lifelong process – a constant effort to keep abreast with rapidly changing industry realities and quality's own way of keeping pace with them. As the needs of the industry and customer change, so does the way quality is monitored and administered. The special quality courses are designed to keep industry professionals up to date with these latest developments.

QUALITY CERTIFICATION FOR BETTER BUSINESS SUCCESS

Raising the Organization's Quality Bar

The stated goal of NVT Quality Certification is to partner your journey towards achieving better business success through the implementation of quality processes. At the core of this is our unrelenting focus on impartial certification. We act as custodians of quality, operating third party certification system in a consistent and reliable manner with a focus on improvement of business processes. To this end, we facilitate improvement in the quality of the deliverables of your organization through process-oriented audits and focus on improvement in business process while ensuring transparency in the quality journey. your organization's value chain, continually re-orienting your quality compass for excellence.

AUDITORS WITH DEEP DOMAIN EXPERTISE

Orienting your Quality Compass for Excellence

Our auditors come with deep domain expertise with over 900 years of cumulative experience across industry in various quality-led capacities. They bring their unflinching focus on quality to your organization, acting not as judges, but partners in your success. Our auditors are known to become an inseparable part of your organization's value chain, continually re-orienting your quality compass for excellence.

NVT at a glance

- Over 22 Years' experience
- Accredited by NABCB and 1st Indian Certification Body accredited by ANAB
- Presence in India, South East Asia, Middle East, Africa & Europe
- Proven Leadership in Aerospace
- Over 6000 audits in AQMS, QMS, EMS, ISMS, OHSAS, EnMS, FSMS

UNRELENTING CUSTOMER FOCUS

Putting the client organization at the center of the quality journey

NVT Quality Certification prides itself in its responsive and collaborative approach to quality. It has a proven effective and planned methodology for testing, validation and auditing. This includes well defined procedures that assist quality service delivery to client with professional audits that have clear and professional communication at all levels. It is little wonder that NVT QC was rated #2 in customer satisfaction assessment & certification parameters by Quality Council of India (QCI) quality compass for excellence.

WHY NVT QC

NVT Quality Certification (NVT QC) has a blend of deep domain expertise, understanding of business processes, highly experienced auditors and our global presence makes us uniquely positioned to help you succeed. NVT QC has been accredited by ANSI-ASQ National Accreditation Board (ANAB), USA and National Accreditation Board for Certification Body (NABCB) India. We have been offering certification services over 22 years, to reputed business groups in India and abroad in the areas of certification for QMS, AQMS, EMS, OSHAS, ISMS, FSHS, EnMS standards.

"NVT auditors are very positive, professional and are domain experts, which helps them to go into depth in audit. Nitta Gelatin has greatly benefited through opportunities of improvement established by auditors and management has always appreciated the OFIs which helps organizations to improve their business & processes."

Dr Chitra

Senior Manager-QA,
NITTA Gelatin India Limited

EXPERTISE IN THE AEROSPACE INDUSTRY

Quality that gives wings to your company

The NVT journey was born in the aerospace industry with Founder Chairman Mr KG Garg spending several years with a leading Indian Aerospace Company. The grounding in quality and excellence he built in the early days has seen NVT Quality Certification rise into prominence as one of the most trusted names in quality, especially for the aerospace industry. The zero-tolerance for quality issues in the critical areas of aviation, space and defence has acted as the sole guiding principle of NVT QC.

GLOBAL PRESENCE

India, South East Asia, Middle East, Africa & Europe

Having completed projects in many locations around the world, we have the global presence and experience necessary to help you capitalize on opportunities in developed and emerging markets. Our wide geographical coverage (India, South East Asia, Middle East, Africa & Europe) enables us to identify and respond swiftly to new trends and opportunities
